

Make An Origami Butterfly:

Follow the steps below to fold an origami butterfly or follow along with our video at weber.edu/dream-center

Step 1: Carefully rip off the right side of the paper

Step 2: Fold the paper in half by folding the upper left corner to the lower right corner. (so its the shape of a triangle)

Step 3: Unfold, then Fold in half again by folding the upper right corner to the lower left. (triangle shape again)

Step 4: Unfold. (you should have a fold that looks like an X)

Step 5: Fold in half again, this time into a rectangle.

Step 6: Unfold then Fold in half again, this time into a rectangle. The opposite direction from the previous rectangle.

Step 7: Unfold. (the folds should look like an X and a +)

Step 8: Bring the left and right creases together to form a triangle. (Dreamer Services shouldn't be visible, only the QR code. the white should be on the inside)

Step 9: Flip the paper so the QR code is on the back, and so the triangle has two points on the top. Fold the right and left corner of the top layer to the bottom corner of the triangle.

Step 10: turn over and Fold the bottom part of the triangle up with a portion of the top corner over hanging the edge.

Step 11: Pull down the top layer left flap of the triangle and the side will be forced to bend in. Fold and flatten the side down. Repeat for the right flap.

Step 12: Turn over. Fold down the top triangle.

Step 13: Fold in half at the center so the two wings touch

Step 14: Diagonally fold the wing as shown. Turn over and repeat.

Step 15: Open the wings and you will have a beautiful butterfly
